

COMMENT FORM

Drive to Prosperity: Manufacturing Drive/Bluff Boulevard Reconstruction

For your convenience in making comments regarding potential infrastructure improvements in the area please use the space provided below. In addition, please use the image on the back of this page to draw circles or lines indicating any specific areas addressed by your comments. Comments may involve existing or proposed improvements, safety, drainage, aesthetics or other concerns you may have in regard to the project.

We will give careful consideration to all of the comments and information provided as the project develops.

Sirs: I recommend that the city be cautious when planting trees on this project.

In many locations I have seen trees planted right under power/utility lines. Then they have to be forever trimmed and finally removed.

Also trees will eventually obscure business advertising as well as some city traffic signs.

Also at many intersections trees/brush often hamper sight distance.
